

Research and Development

Advances knowledge and provides solutions that improve efficiency and competitiveness and promote a sustainable egg industry.

Nutrition, Genetics, Disease prevention, Animal welfare, New techniques, Products and protocols

Technology Developer

Advances and implements innovative technological solutions to various aspects of egg production.

Cutting-edge systems, Software, Monitoring systems, Environmental controls, Data analysis

Grain Producer

Cultivates and provides high-quality grains to supply the production of nutritious feed for hens, supporting the egg industry and ensuring a steady supply of eggs for consumption.

Supply, Traceability, Partnership, Customisation, Reliability

Poultry Breeder

Selectively breed chickens to develop specific traits that are desirable for egg production. Manages breeding programs and monitors the health and genetics of the birds.

Productivity, Quality and availability of stock

Careers in the AUSTRALIAN EGG INDUSTRY

Hatchery Assistant

Ensures the successful hatching and healthy development of chicks by monitoring and controlling factors that impact development.

Maintaining equipment, Vaccinating

Veterinarian

Provides expertise and knowledge to ensure the health and well-being of the laying hens. Responsible for various aspects of animal care, including disease prevention, diagnosis, and treatment.

Monitor flock health, Vaccination programs, Health checks, Medical interventions, Collaborate, Animal welfare standards

Poultry Production Manager

Manages activities, including day-to-day activities, monitoring flock health, optimising feed and nutrition programs, and managing egg collection and grading. Ensures biosecurity protocols are followed and implements quality control measures.

Supervising, Training, Operations, Compliance

Biosecurity Officer

Implements and enforces measures to prevent the introduction and spread of diseases or pests. Ensures the safety of eggs and maintains the industry's reputation.

Develop protocols, Educate stakeholders, Monitor and control access to farm

Agri-environmental Scientist

Promote sustainable practices and minimise the environmental impact of egg production.

Research and assess, Develop strategies, Collaborate with stakeholders, Implement environmental practices

Marketing and Trade Officer

Promotes and sells eggs to various markets, manages trade relationships, and optimises market access.

Market research, Develop branding, Advertising strategies, Pricing strategies, Market forecasting

Food Safety Manager

Ensures processing, packaging, and distribution adhere to strict food safety standards and regulations. Collaborate to maintain compliance and uphold the highest standards of food safety within the egg industry.

Develop and implement food farm safety protocols, Conduct inspections, Audits, Staff training, Monitor potential risks, Respond to food safety incidents or recalls

Chief Executive Officer

Highest-ranking executive responsible for overseeing the entire operation and strategic direction of the company. Drives success and profitability while maintaining a focus on quality, sustainability, and meeting consumer demands.

Leadership, Business decisions, Financial health and growth, Sets goals Business plans
