

Sustainable Australian Eggs

Environmental Sustainability

Environmental sustainability describes the adoption of practices and systems in agricultural production that prioritise the long-term health and resilience of resources and ecosystems. This aims to achieve the ongoing availability of food and fibre to meet the needs of present and future generations.

Economic Sustainability

Economic sustainability encompasses the management of food and fibre production that is financially viable and profitable for stakeholders at the local, regional, national, and international levels. It focuses on ensuring economic growth and contributing to the overall stability and prosperity of the agricultural sector.

Social Sustainability

Social sustainability emphasises the promotion of high-quality of life for workers, communities, and consumers associated with the agricultural sector. It seeks to cultivate inclusive and resilient agricultural systems that contribute to the overall welfare and satisfaction of people connected to the industry.
