

Determination of the genomic sequence of *Mycoplasma gallisepticum*

Organisation: The University of Melbourne

Publication: 1 December 2004

Researchers: G.F. Browning and P.F. Markham

Categories: Biosecurity & Flock Health

Tags: virulent, bacteria, genes, genome, mycoplasma gallisepticum, sequencing, strain

This study follows the University of Melbourne project to sequence the genome of the *Mycoplasma gallisepticum* disease. This project was undertaken in order to develop a better vaccine against this disease.
