

Investigating the cause of Miliary Hepatitis in laying chickens

Organisation: Department of Primary Industries, Victoria

Publication: 1 December 2005

Researchers: W.M. Forsyth, R. Hodgeman, B.S. Oyay

Categories: Biosecurity & Flock Health

Tags: inoculation, layer hens, bacterium, broiler hens, causative organism, histopathology, lesion, Miliary hepatitis, model, toxin, disease, vaccine

Miliary hepatitis can cause mortalities and loss of egg production in chickens. The cause is unknown. This trial attempted to establish a model of the disease, so that preventative and control measures can be undertaken.
