

National Food Safety Risk Profile of Eggs and Egg Products

Organisation: SARDI

Publication: 1 July 2005

Researchers: B. Daughtry, J. Sumner, G. Hooper, C. Thomas, T. Grimes, R. Horn, A. Moses, A. Pointon

Categories: Food Safety

Tags: pathogen, risk management, Antimicrobial Resistance, chemical hazards, plant-associated toxins, salmonella

This report set out to identify the following; hazards that enter any point of the food chain for eggs and egg products, potential management strategies for the identified high risk hazards, and product/pathogen combinations in which further risk analysis might be required by risk managers.
