

Typing of *Pasteurella multocida*

Organisation: The University of Queensland

Publication: 1 November 2005

Researchers: S. Subaaharan, P.J. Blackall and L.L Blackall

Categories: Biosecurity & Flock Health

Tags: phylogenetic, dendogram, enzyme electrophoresis, Multi-locus Sequence Typing, bacterial, mutations, strain, *pasteurella multocida*

The objective of the project was to establish a novel DNA-based typing scheme for *Pasteurella multocida*. This publication describes the development of the first ever Multi-locus Sequence Typing scheme for this bacteria. .
